Spot Brighton's top landmarks

The Compass

A compass is a magnetic device used to work out which direction you are facing. It works by using a tiny pin magnet, which interacts with the earth's magnetic field and always points North. If you know where North is, you can work out the other directions of the compass.

Can you tell us which direction the landmarks below are in?

Are they in the north, south, east or west sections of the BA i360 pod?

Clue: use our viewing map for help.
