

Reflection & Symmetry

Symmetry

An object is symmetrical when it is the same on both sides. It is also called a mirror image because a mirror reflects whatever it is next to.

Discuss with your group which building pictured below is symmetrical? Can you think of any other symmetrical buildings?

The Royal Pavilion

Symmetrical

Non-Symmetrical

The Guggenheim Museum Bilbao

Symmetrical

Non-Symmetrical

You have taken a picture of the British Airways i360 but only half of it has come out. Luckily it is symmetrical and so you can draw the other half. Remember the blank side should be a mirror image!
